

Bespoke Gallery

We specialise in developing tailor made articles and designs to suit your bespoke requirements

Flow Moulding

This allows us to recreate textures and designs and incorporate them into stitched products. It is a very versatile process that can raise or emboss logos at the same time, and is particularly good at generating very modern and cutting edge products.

Micro Moulding

Contrast Stitching

If required we can make any of our products using colour contrast thread

4 colour Digital Logos

For complicated 2+ colour logo's, and logos with tints, where registration with conventional screen printing is impossible, we recommend our new 4 col digital print system

Four Colour Process

We can uniquely print four colour process logo's and full photographic images on to stitched articles

Vogue Photo range see page 12-13

Special Interiors

We can make to order customised interior layouts, for bespoke pockets.
